

I HAVE ISSUES

Tom Van Doorslaer @TomVanDoo · 8 Nov 2018

It's so fluffffyyyyyy!

Tom Van Doorslaer @TomVanDoo · Mar 6

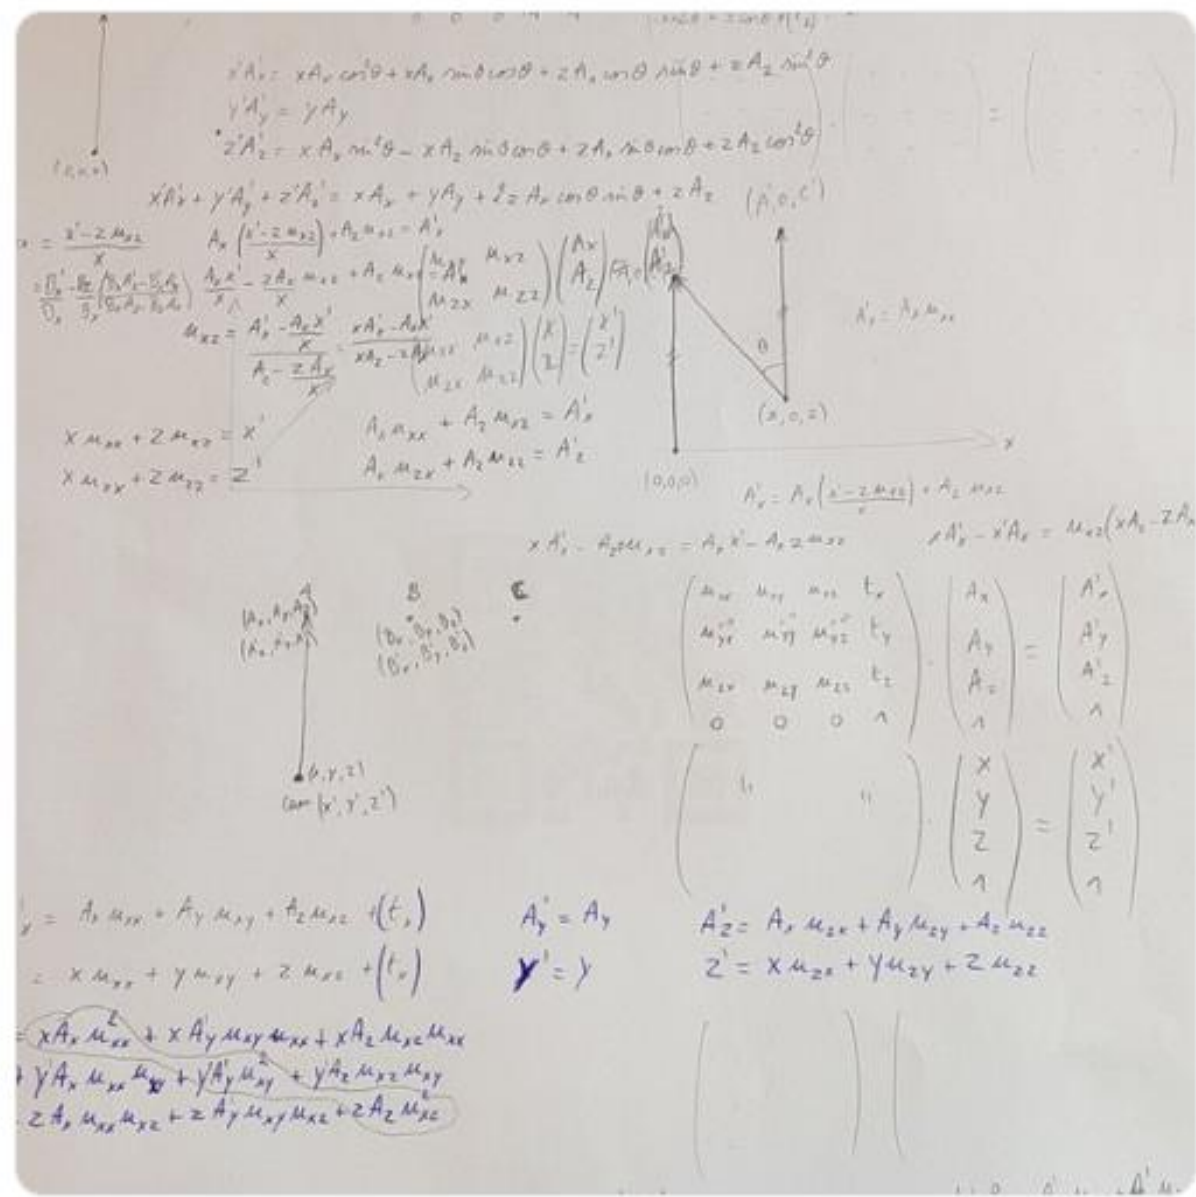

I'm going nuts...

Tom Van Doorslaer @TomVanDoo · Apr 5

So I had an issue with a 3D transformation on the #Hololens and decided to ask help from a colleague fresh out of #Uni. I think she's a keeper.

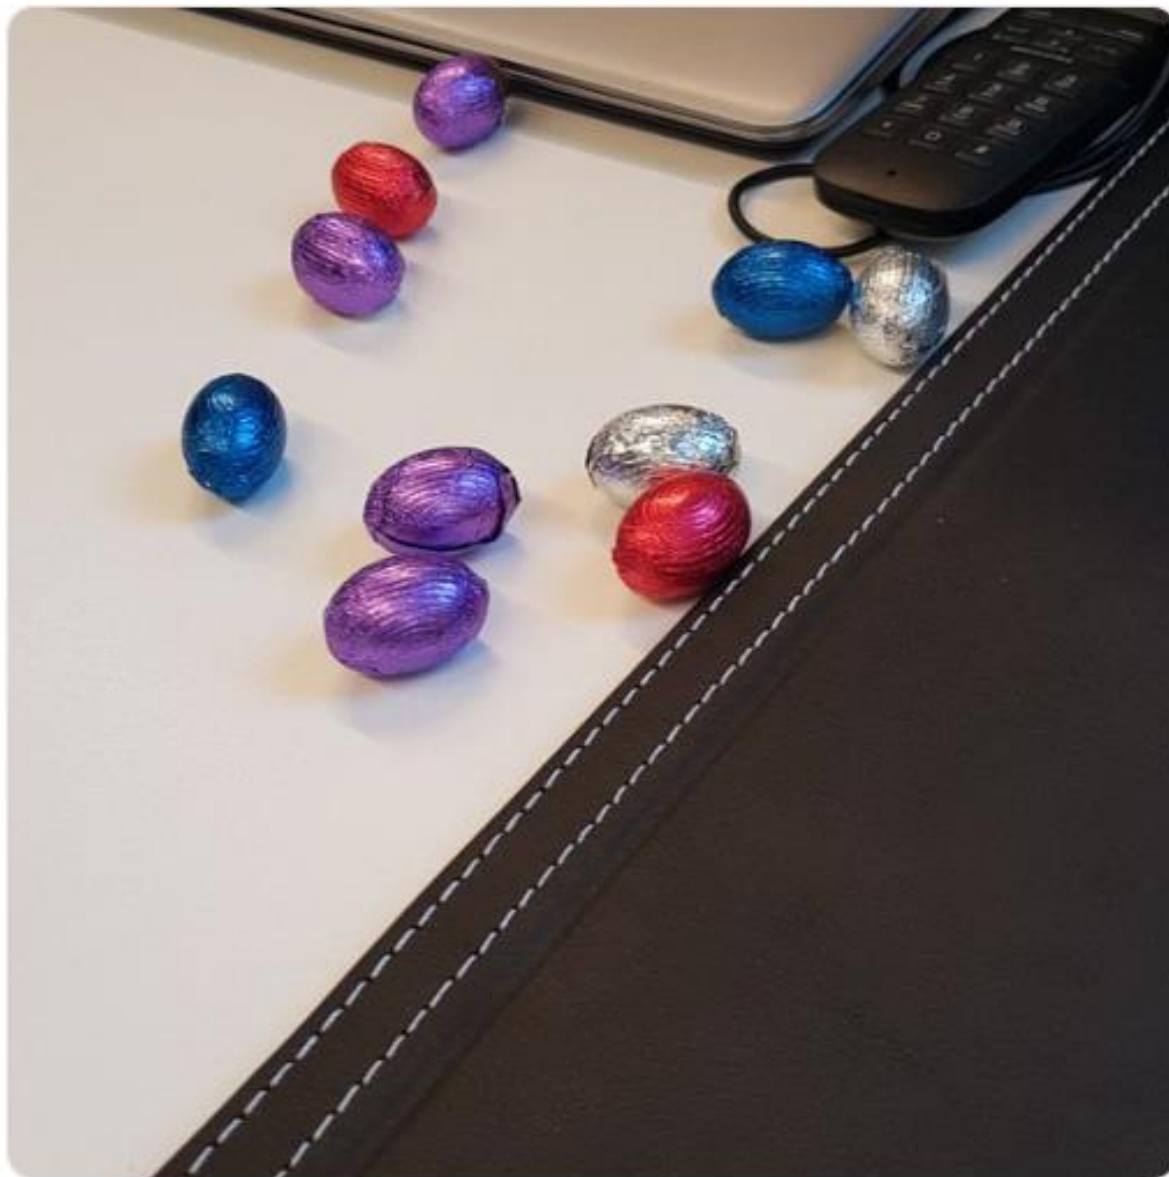

Tom Van Doorslaer @TomVanDoo · Apr 10

my colleagues are assholes. I'm trying to eat healthy and they keep throwing chocolate eggs at my desk. cc @rpanneel @KaouassRachid

Tom Van Doorslaer @TomVanDoo · 12 Dec 2018

I swear, I just went to the shop for some food!! These two followed me all the way home...

I couldn't stop them!

#UI5 #UniCore

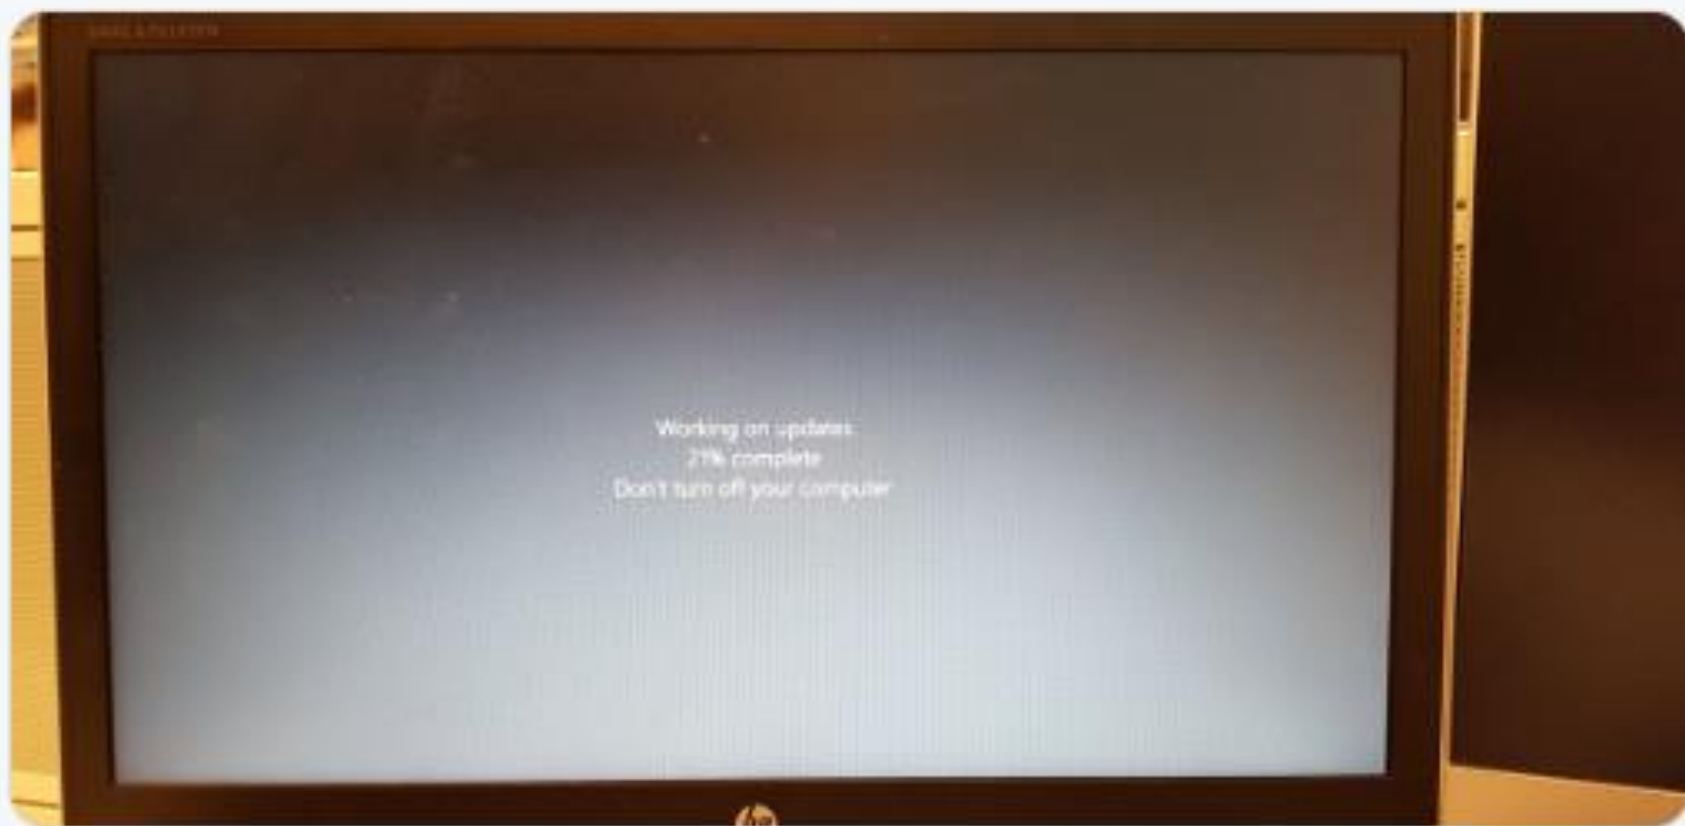

Tom Van Doorslaer @TomVanDoo · Mar 4

#Monday.... workstation crashed, laptop stuck in update loops and the coffee sucks....

Tom Van Doorslaer @TomVanDoo · Feb 2

omg, I'm not the only nutcase that considered sorting books by color!

Dee2 🏳️🌈 🍰 @deedeeflagg

Replying to @kurteichenwald

much more artistic, and useful.

Tom Van Doorslaer @TomVanDoo · 14 Dec 2018

okay,
I have issues.

Tom Van Doorslaer @TomVanDoo · 1 Dec 2018

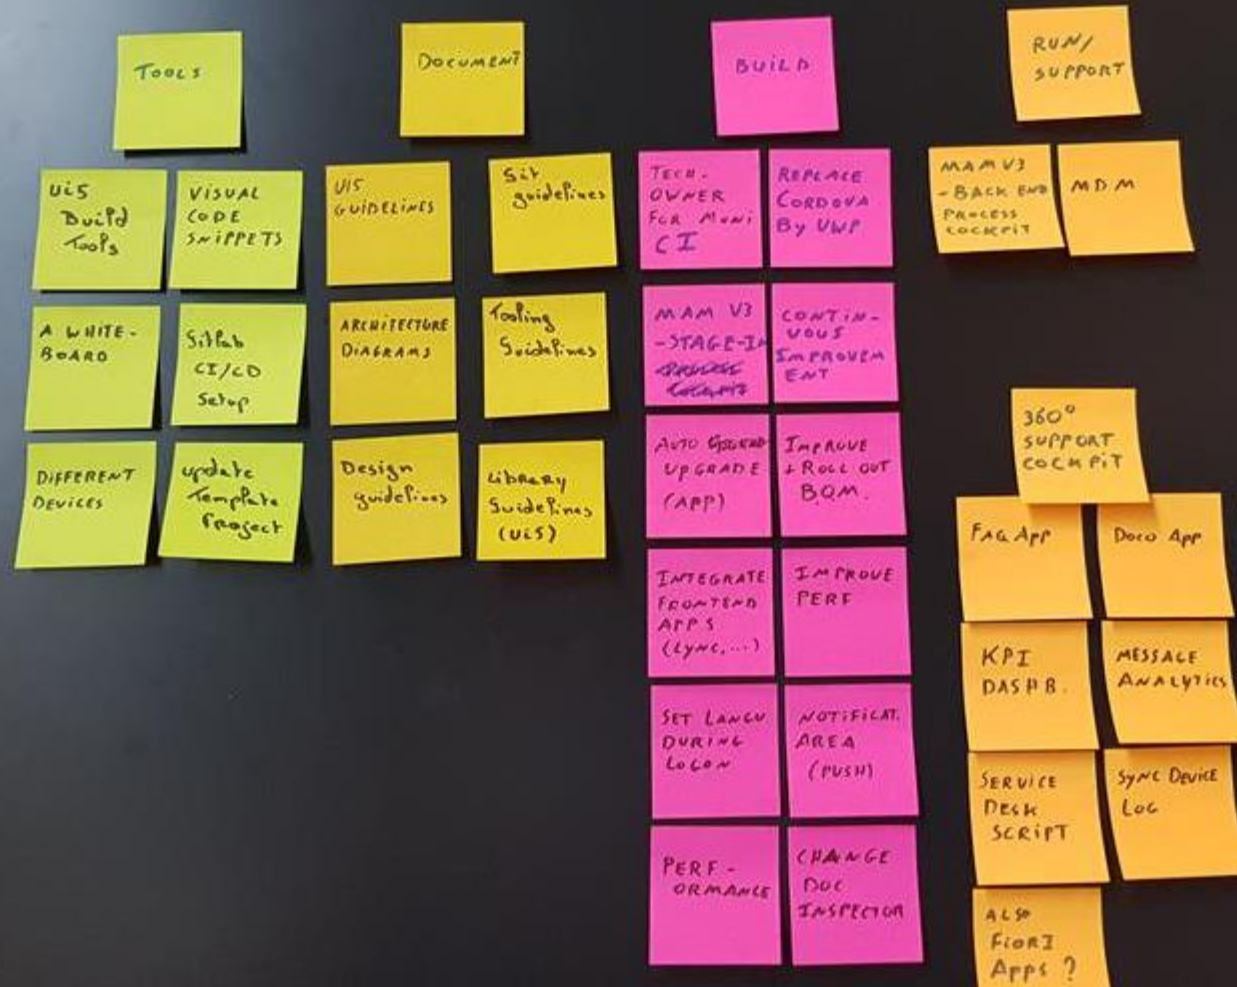

okay. I admit. I have issues... this Christmas, everyone is getting a Unicorn..

Issues with my issues

- Started with Excel (yuck)
- We tried post-its

Permission Denied

This means, oh you worry. Here's how to

- Open up the Mac Tool
- Type cd "/
- C:\Users\...
- Within the

Issues

- Started with Excel (yuck)
- We tried post-its
- Eventually settled for gitlab

Why Gitlab?

- Because it's free
- Because you can run your own server on-premise
- Because our customer already had it running
- Because we were able to paste screenshots in our issues.

Issues

The screenshot displays the SAPmobile Signalization_V2 Issue Boards interface. The top navigation bar shows the path: SAPmobile > Signalization_V2 > Issue Boards. A search bar is located below the navigation bar. The main area is divided into five columns representing different stages of the issue lifecycle:

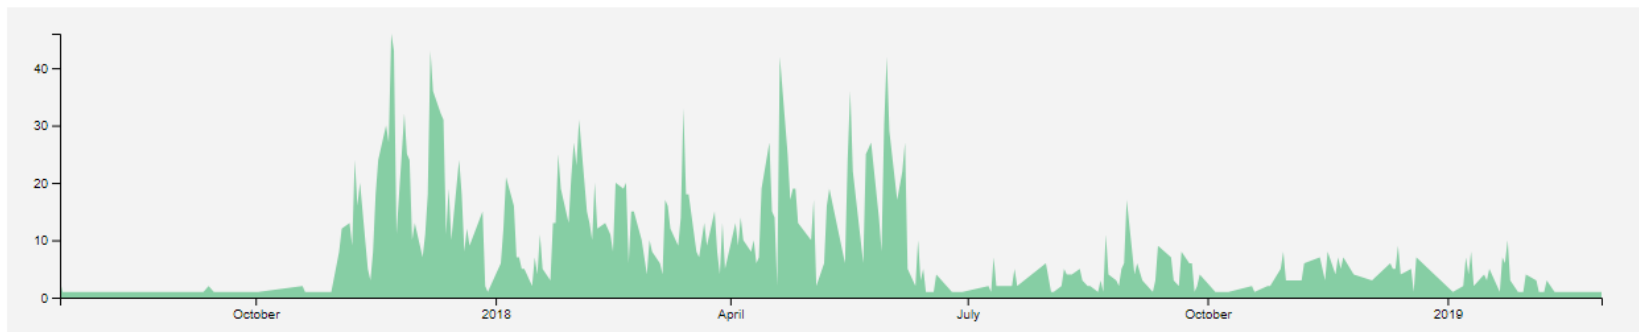

- Open** (13 items):
 - SI V2 - Admin (#215)
 - CR - Display linked Notification attachments on Workorder (Prio 2, #75)
 - Checklist - Tracks - IC comment entered after clicking Complete bu before synchronisation creates sync error (Prio 3, #400)
 - General - Backend not accessible message when trying to sync after loosing connection (Prio 1, #393)
 - Checklist - Last Value column: display cross if last value was rejected
- Needs Feedback** (0 items)
- In Progress** (1 item):
 - CR - Functional locations - Object Links (In Progress, Prio 2, #247)
- Ready To Package** (1 item):
 - Checklist - Check at confirmation of operation for mandatory actions - FR message - Inventory not completed (Prio 3, Ready To Package, #396)
- Test dev** (1 item):
 - CR - Inventaire / S datamatrix to the (Prio 1, Test dev, #362)

Each item card includes a title, priority label, ID number, and the SAP logo.

Branching strategy

- We based our branching strategy on best practices
 - <http://nvie.com/posts/a-successful-git-branching-model/>
- Master branch only contains what's in production
- Development branch contains Whatever is ready and tested for your next release
- Every feature you build or fix goes into a feature branch of development
- You test and validate it separately and only merge into dev when it works.

Branching strategy

Merge

- QA review
- Merge from feature to development
- Squash commits
- Remove source branch
- Build
