BELGIUM
SAP Inside Track

To ABAP or not to ABAP

Key learnings

- SAP pays someone to invite people to a bar and drink beer while talking about SAP

Key learnings

- SCP continuous delivery comes from a garbage truck

Key learnings

- We need a longer HDMI cable

Key learnings

- Cloud Application Programming Model is a higher level abstraction than the Cloud SDK

Key learnings

- SAP systems are critical for many organizations, but their security isn't

Key learnings

- Who needs a psychologist when you have gitlab?

Key learnings

- Domain driven design is more than a naming convention.

Key learnings

- You can hunt zombies using SAP tech

Key learnings

- In IOT Scenarios, a dump may result in explosions

Key learnings

- ABAP definitely has a future, and it's catching up

Thank you speakers

- Matthias Wild – SAP community
- Marco Dahms – Development and continuous delivery on SCP
- Joris van de Vis – Your SAP system is at risk
- Paul Hardy – Future of ABAP
- Tom Van Doorslaer – I have issues
- Laurens Van Rijn – Hitchhikers guide to the legacy
- Vladim klimov – Troubleshooting Node.JS on SCP
- Tudor Riscutia – DDD on ABAP and SCP
- Dries and Wouter – Blowing up coffee machines
- Christian Drumm – Zombie hunting!

Today was awesome

After event dinner:

Aperitive at cafe Hopper
[Address](): Leopold de Waelstraat 2, 2000 Antwerpen
